

ChanceForge – Joke Book

A Spark & Anvil joke book. Groan-worthy puns, tricky riddles, silly nonsense, and real fun facts from the world of ChanceForge – read them out loud and make someone laugh.

Why did the coin go to therapy?

It couldn't stop flipping between two sides of every issue!

How to use this book

Read a joke, pause at the question, and try to guess the answer before you read on. Best of all: read them out loud to a friend, a grown-up, or your class. A good laugh makes the tricky stuff easier – that's real science.

Spark & Anvil is a 501(c)(3) public charity. Every app, story, and book is free, forever – no ads, no in-app purchases, no tracking. Released under Creative Commons BY-NC-SA 4.0 for educational reuse.

Puns

Why did the coin go to therapy?

💡 It couldn't stop flipping between two sides of every issue!

Why was the statistics teacher always calm?

💡 Because she knew things would eventually return to the mean!

Why did the dice refuse to play?

💡 They felt like they were always being thrown around!

What did the normal distribution say at the party?

💡 "I'm the bell of the ball!"

Why did the outlier get excluded from the data set?

💡 It just didn't fit in!

What did the probability say to the certainty?

💡 "You're a 1 in a million... actually, exactly a 1."

Why was the median the most popular number in the class?

💡 Because it was always right in the middle of everything!

Why do statisticians love nature?

💡 Because of all the natural distributions!

What did the sample say to the population?

💡 "I may be small, but I represent you pretty well!"

Why did the bar graph break up with the pie chart?

💡 It said, "You're too busy going in circles!"

What's a statistician's favorite ride at the amusement park?

💡 The roller-coaster -- it has the best standard deviations!

Why did the probability student bring an umbrella to school on a sunny day?

💡 Because there was a non-zero chance of rain!

What did the biased coin say to the fair coin?

💡 "I'm always heads above the rest!"

Why did the expected value cross the road?

💡 Because on average, that's where it was supposed to end up!

Why should you never trust a histogram?

 Because it has a lot of bars and might be skewed!

Why did the spinner feel dizzy?

 It kept going around and around the probability wheel!

What did one die say to the other?

 "We make a great pair!"

Why was the correlation so clingy?

 Because it couldn't stop following the trend!

Why did the random number generator feel unappreciated?

 Nobody could ever predict what it would do next!

What did the mode say to the data set?

 "I'm the most popular number here and everyone knows it!"

Keep laughing

That's **20 jokes** from ChanceForge. Made someone laugh? Try making up your own – the best jokes are the ones you tell.
