

MachineForge – Joke Book

A Spark & Anvil joke book. Groan-worthy puns, tricky riddles, silly nonsense, and real fun facts from the world of MachineForge – read them out loud and make someone laugh.

Why did the lever break up with the fulcrum?

It needed more support!

How to use this book

Read a joke, pause at the question, and try to guess the answer before you read on. Best of all: read them out loud to a friend, a grown-up, or your class. A good laugh makes the tricky stuff easier – that's real science.

Spark & Anvil is a 501(c)(3) public charity. Every app, story, and book is free, forever – no ads, no in-app purchases, no tracking. Released under Creative Commons BY-NC-SA 4.0 for educational reuse.

Puns

Why did the lever break up with the fulcrum?

💡 It needed more support!

I tried to tell a joke about a wedge, but it just split the audience.

Why are gears such good friends?

💡 They always mesh well together!

The pulley was feeling down, so its friend said, "Let me lift you up!"

Why did the screw get promoted?

💡 Because it was always turning things around!

The inclined plane never gets stressed -- it just takes things at an angle.

Why was the wheel always so tired?

💡 Because it never stopped going around!

What did one gear say to the other?

💡 "You really grind my teeth!"

Why do engineers love playgrounds?

 Because seesaws are just levers with better marketing!

The catapult business is booming -- launches are through the roof!

Why couldn't the simple machine tell a lie?

 Because it always showed its work!

Friction is the worst party guest -- it's always slowing things down.

Why did the Rube Goldberg machine take so long to make toast?

 It had 47 steps before the bread even showed up!

My friend asked me to explain torque. I said, "Let me put a spin on it."

The axle wanted to quit its job, but the wheel said, "You're the center of everything I do!"

Why did the ramp go to school?

 To get a higher education!

Two pulleys walked into a bar. The bartender said, "You two always have strings attached."

Why are compound machines so dramatic?

 They always make a big production out of everything!

The lever told the wedge, "I've got a lot of leverage in this relationship."

Why did the engineer bring a ladder to the physics test?

Because the questions were on a whole new level!

Keep laughing

That's **20 jokes** from MachineForge. Made someone laugh? Try making up your own – the best jokes are the ones you tell.
