

MakerForge – Joke Book

A Spark & Anvil joke book. Groan-worthy puns, tricky riddles, silly nonsense, and real fun facts from the world of MakerForge – read them out loud and make someone laugh.

Why did the 3D printer go to therapy?

It had too many layers of issues!

How to use this book

Read a joke, pause at the question, and try to guess the answer before you read on. Best of all: read them out loud to a friend, a grown-up, or your class. A good laugh makes the tricky stuff easier – that's real science.

Spark & Anvil is a 501(c)(3) public charity. Every app, story, and book is free, forever – no ads, no in-app purchases, no tracking. Released under Creative Commons BY-NC-SA 4.0 for educational reuse.

Puns

Why did the 3D printer go to therapy?

💡 It had too many layers of issues!

What did the circuit say to the battery?

💡 "You really give me a charge!"

Why was the soldering iron always invited to parties?

💡 It knew how to make great connections!

What did the LED say when it finally turned on?

💡 "I'm de-lighted!"

Why did the resistor break up with the capacitor?

💡 There was too much resistance in the relationship!

What do you call a 3D print that fails halfway through?

💡 A half-baked idea!

Why did the engineer bring a ruler to the meeting?

💡 To measure up to expectations!

What did the wire say to the breadboard?

💡 "I feel a real connection between us!"

Why was the materials scientist so stressed?

💡 They were under a lot of pressure -- and shear stress too!

What did the prototype say to the final product?

💡 "I was just a rough draft of you!"

Why did the motor keep running?

💡 It was very driven!

What's a 3D printer's favorite music?

💡 Heavy metal -- layer by layer!

Why did the Arduino board go to school?

💡 To get more programming experience!

What did the drill say to the screw?

💡 "I'm really boring, but you find me riveting!"

Why was the blueprint feeling blue?

💡 Nobody was following its plans!

What did the filament say as it melted?

💡 "I'm losing my composure -- and my shape!"

Why do engineers make good comedians?

💡 They always deliver with great timing -- and tolerances!

What did the transistor say to the circuit?

💡 "I can switch things up around here!"

Why was the sensor always the first to know everything?

💡 Because it was very touchy about changes in the environment!

What did the caliper say to the object?

💡 "Let me get the measure of you!"

Keep laughing

That's **20 jokes** from MakerForge. Made someone laugh? Try making up your own – the best jokes are the ones you tell.
