

PrismForge – Joke Book

A Spark & Anvil joke book. Groan-worthy puns, tricky riddles, silly nonsense, and real fun facts from the world of PrismForge – read them out loud and make someone laugh.

Why did the light beam go to school?

To get a little brighter!

How to use this book

Read a joke, pause at the question, and try to guess the answer before you read on. Best of all: read them out loud to a friend, a grown-up, or your class. A good laugh makes the tricky stuff easier – that's real science.

Spark & Anvil is a 501(c)(3) public charity. Every app, story, and book is free, forever – no ads, no in-app purchases, no tracking. Released under Creative Commons BY-NC-SA 4.0 for educational reuse.

Puns

Why did the light beam go to school?

💡 To get a little brighter!

What did the mirror say to the incoming light ray?

💡 "I see you've come to reflect on things!"

Why was the prism so popular?

💡 It always showed its true colors!

What did the convex lens say to the scattered light rays?

💡 "Let me bring you all together -- I'm very focused!"

Why did the photon check luggage at the airport?

💡 Because it was traveling light!

What did one color of the spectrum say to the other?

💡 "We make a brilliant team when we're not being so divided!"

Why did the concave mirror feel self-conscious?

💡 Everything it reflected was upside down!

What's a lens's favorite type of exercise?

 Focal stretches!

Why did the laser beam feel special?

 Because it was always on point and never scattered!

What did the refractive index say to the light ray?

 "I'm going to change your direction in life!"

Why did the rainbow apologize?

 It didn't mean to break the white light up -- it was just going through a prism!

What do you call a mirror that tells jokes?

 A fun-house reflection!

Why was the fiber optic cable such a great communicator?

 It always kept things internal -- total internal reflection!

What did the ultraviolet ray say when it wasn't invited to the visible light party?

💡 "That's shady -- I'm just outside your range!"

Why did the magnifying glass feel powerful?

💡 It could make small problems look much bigger!

What did the telescope say to the microscope?

💡 "I take the long view; you're always sweating the small stuff!"

Why was the aperture always so polite?

💡 It knew when to open up and when to close down!

What did the infrared ray say to the visible light?

💡 "You may get all the attention, but I'm the one keeping everyone warm!"

Why did the optics student ace every test?

💡 They had a clear focus and a brilliant outlook!

What do you call a group of photons heading the same direction?

💡 A ray of sunshine with great teamwork!

Keep laughing

That's **20 jokes** from PrismForge. Made someone laugh? Try making up your own – the best jokes are the ones you tell.
