

AiForge — Concept Poster

Print this and pin it up — an at-a-glance map of the AiForge cast and the ideas each one carries. Come back to it whenever you want to remember who teaches what.

Spark & Anvil is a 501(c)(3) public charity. Every app, story, and book is free, forever — no ads, no in-app purchases, no tracking. Released under Creative Commons BY-NC-SA 4.0 for educational reuse.

Meet the cast — and what each one teaches

Character	What they carry
Sort	Classifier — the simplest ML; putting things in categories
Feed	Training data — the examples a model learns from; garbage-in-garbage-out
Skew	Bias — where AI systems go wrong when training examples lean
Edge	Model limitations — what a model can't do; modeling 'I don't know' as a good answer
Stake	Ethics — what's at stake in deploying AI; people choosing, not rules-from-the-sky
Split	Train/test split — keep some examples hidden to tell learning from memorizing
Cue	Features — a model decides from the clues you give it; choose good clues
Sure	Confidence — a model reports how sure it is; low confidence means check, not trust
Mirage	Hallucination — when a model confidently makes something up that sounds true but isn't; check, don't just trust
Rote	Overfitting — when a model memorizes the exact examples instead of learning the general idea

Key ideas at a glance

The big concepts this cast helps you master:
