

DataForge — Concept Poster

Print this and pin it up — an at-a-glance map of the DataForge cast and the ideas each one carries. Come back to it whenever you want to remember who teaches what.

Spark & Anvil is a 501(c)(3) public charity. Every app, story, and book is free, forever — no ads, no in-app purchases, no tracking. Released under Creative Commons BY-NC-SA 4.0 for educational reuse.

Meet the cast — and what each one teaches

Character	What they carry
Catch	Data collection — who-what-why-when posture (every dataset has a collector + purpose + omissions)
Tidy	Data cleaning — preparation-with-integrity posture (every cleaning choice changes meaning; document the choices)
Graph	Data visualization — shape-of-the-story posture (which chart tells the truth, not the loudest one)
Tell	Interpretation — correlation-not-causation posture (data shows patterns; humans interpret; confidence not certainty)
Guard	Data ethics — bias-privacy-harm-consent posture (who benefits, who's harmed, who decided; structurally present in every kit from kit 6)

Key ideas at a glance

The big concepts this cast helps you master:

- Data Types & Collection
 - Reading & Creating Graphs
 - Measures of Center
 - Probability
 - Data Distributions
 - Statistical Questions
 - Data Analysis
 - Intro to Coding with Data
 - Data Science
-
